

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1-7. (canceled).

8. (currently amended): A cellular telephone set capable of performing animation display of any one of a stored plurality of characters, comprising:

character presentation means for controlling animation display of said character upon occurrence of an event on the set depending upon history information corresponding to said event and further depending upon an occurrence timing of a predetermined operation relating to said event, wherein prior to the occurrence of said event, said character is not related to said occurring event. [[.]]

9. (original): The cellular telephone set as set forth in claim 8, wherein said character presentation means controls animation display of said character so as to differentiate patterns depending upon odd number and even number of an occurrence time of said predetermined operation.

10. (original): The cellular telephone set as set forth in claim 8, wherein said character presenting means controls animation display of said character depending upon particular date and time information preliminarily set in a schedule function.

11. (original): The cellular telephone set as set forth in claim 8, which further comprises a first casing containing a key operation portion and a second casing connected to said first casing for opening and closing and detecting means for detecting open and closed conditions of said first and second casing,

said character presentation means controls animation display of said character depending upon result of detection of variation of opening and closing states of said first and second casing by said detecting means.

12-18. (canceled).

19. (previously presented): A character display presentation method of a cellular telephone set capable of performing animation display of any one of a stored plurality of characters, comprising:

step responsive to occurrence of an event on the set of controlling animation display of said character depending upon history information and further depending upon an occurrence timing of a predetermined operation relating to said event, wherein prior to the occurrence of said event, said character is not related to said occurring event.

20. (original): The character display presentation method as set forth in claim 19, wherein in said step of controlling animation display, animation display of said character is controlled so as to differentiate patterns depending upon odd number and even number of an occurrence time of said predetermined operation.

21. (original): The character display presentation method as set forth in claim 19, wherein in said step of controlling animation display, animation display of said character is controlled depending upon particular date and time information preliminarily set in a schedule function.

22. (original): The character display presentation method as set forth in claim 19, wherein in said step of controlling animation display, animation display of said character is controlled depending upon result of detection of variation of opening and closing states of a first casing containing a key operation portion and a second casing connected to said first casing for opening and closing.

23. (canceled).

24. (previously presented): A storage medium storing a program to cause a computer to implement functions of a character display presentation method of a cellular telephone set

capable of performing animation display of any one of a stored plurality of characters, said functions comprising:

operating a computer for executing a process responsive to occurrence of an event on the set, of controlling animation display of said character depending upon history information depending upon an occurrence timing of a predetermined operation relating to said event wherein prior to the occurrence of said event, said character is not related to said occurring event.

25. (canceled).
